As far as the FIs are concerned, BLand is primarily responsible for the fulfilment of its obligations under the Put Options. However, BGroup later informed BLand that it would not be able to meet its obligation. 2. SIGNIFICANT ACCOUNTING POLICIES

(1) Basis of Preparation

The financial statements of the Group and of the Company have been prepared under the historical cost convention unless otherwise indicated in the accounting policies below and comply with the provisions of the Companies Act, 1965 and applicable approved accounting standards of the Malaysian Accounting Standards Board ("MASB").

(2) Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and all its subsidiary companies made up to the end of the financial year.

Subsidiary companies are those entities controlled by the Company. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities.

Subsidiary companies are consolidated using the acquisition method of accounting except for the business combination with Singer (Malaysia) Sdn Bhd and BGroup, which have been accounted for under the merger method as the criteria for merger accounting were met.

Under the merger method of accounting, the results of the subsidiary companies are presented as if the companies had been combined throughout the current and previous financial years. The difference between the cost of acquisition and the nominal value of the share capital and reserves of the merged subsidiary companies is taken to merger reserve (or adjusted against any suitable reserve in the case of debit differences).

Under the acquisition method, the results of subsidiaries acquired or disposed of during the financial year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate. The assets and liabilities of a subsidiary company are measured at their fair values at the date of acquisition and these values are reflected in the consolidated balance sheet. The difference between the acquisition cost and the fair value of the Group's share of net assets of the acquired subsidiary company at the date of acquisition is included in the consolidated balance sheet as goodwill or negative goodwill arising from consolidation as appropriate.

In the preparation of the consolidated financial statements, the financial statements of all companies are adjusted for the material effects of dissimilar accounting policies. Intragroup transactions, balances and unrealised gains are eliminated on consolidation and the consolidated financial statements reflect external transactions only. Unrealised losses are eliminated on consolidation unless costs cannot be recovered.

Minority interests in the consolidated balance sheet consist of the minorities' share of the post-acquisition fair values of the identifiable assets and liabilities of the acquiree as at acquisition date and the minorities' share of movements in the acquiree's equity since then.

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(3) Associated Companies

Associated companies are companies in which the Group has a long-term equity interest and where it exercises significant influence over their financial and operating policies through Board representation. Investments in associated companies are accounted for in the consolidated financial statements by the equity method of accounting based on the latest audited or management financial statements of the companies concerned made up to the Group's financial year-end.

Under the equity method of accounting, the Group's share of results of associated companies during the financial year is included in the consolidated financial statements. The Group's share of results of associated companies acquired or disposed of during the year, is included in the consolidated income statement from the date that significant influence effectively commences or until the date that significant influence effectively ceases, as appropriate.

Unrealised gains on transactions between the Group and the associated companies are eliminated to the extent of the Group's interest in the associated companies. Unrealised losses are eliminated unless cost cannot be recovered.

The Group's interest in associated companies is carried in the consolidated balance sheet at cost plus the Group's share of post-acquisition retained profits or accumulated losses and other reserves, less impairment losses.

Short term leasehold land is amortised on a straight-line basis over the remaining period of the lease of 14 years.

Land held for property development is reclassified as property development costs at the point when development activities have commenced and where it can be demonstrated that the development cycle can be completed within the normal operating cycle.

(10) Leases and Hire Purchase Arrangements

A lease is recognised as a finance lease if it transfers substantially to the Group all the risks and rewards incident to ownership. All other leases are treated as operating leases.

(i) Finance leases and hire purchase arrangements

Assets acquired by way of hire purchase or finance leases are stated at an amount equal to the lower of their fair values and the present value of the minimum lease payments at the inception of the leases, less accumulated depreciation and impairment losses. The corresponding liability is included in the balance sheet as liabilities. In calculating the present value of the minimum lease payments, the discount factor used is the interest rate implicit in the lease, when it is practical to determine; otherwise, the entity's incremental borrowing rate is used.

Lease payments are apportioned between the finance costs and the reduction of the outstanding liability. Finance costs, which represent the difference between the total leasing commitments and the fair value of the assets acquired, are recognised as an expense in the income statement over the term of the relevant lease so as to produce a constant periodic rate of charge on the remaining balance of the obligations for each accounting period.

The depreciation policy for leased assets is consistent with that for depreciable property, plant and equipment as described in Note 2(11).

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(10) Leases and Hire Purchase Arrangements (cont'd)

(ii) Operating leases

Operating leases are leases other than finance leases. Lease rental under operating lease is charged to the income statement on a straight line basis over the term of the relevant lease.

(11) Property, Plant and Equipment and Depreciation

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

Hotel properties comprise hotel land, building and integral plant and machinery. It is the Group's practice to maintain these properties at a high standard and condition such that residual values are at least equal to book values and consequently, depreciation would be insignificant. Accordingly, no depreciation is provided on freehold hotel properties or long leasehold hotel properties with unexpired lease tenure of 50 years or more. The related maintenance expenditure is dealt with in the income statement.

To establish whether the residual value of the hotel properties are at least equal to their respective book values, all hotel properties are appraised by independent professional valuers at least once in every five years based on open market value. Where the residual values of the hotel properties are less than their respective book values, a write down of book values to their recoverable amounts will be made. The amount of reduction will be recognised as an expense in the income statement.

Freehold land, long leasehold land with unexpired lease tenure of 50 years or more, and capital work-in-progress are not depreciated. The directors are of the opinion that the long leasehold land have residual values that will not be materially different from its cost. The depreciation charges are not expected to be material in view of its long useful life. Had the long leasehold land of the Group been amortised over its useful life, there will be an additional depreciation charge of RM489,000 (2005: RM700,000) to the income statement. On all other property, plant and equipment, depreciation is provided on a straight-line basis calculated to write off the cost of each asset to its residual value over its estimated useful life. The principal annual rates of depreciation are:

Short leasehold land Over the period of the lease not exceeding 50 years

Short leasehold hotel properties Over 50 years **Buildings** 1.25% - 2.5% 6.66% - 50% Plant and equipment 5% - 25% Renovation Computer and office equipment 5% - 50% Furniture and fittings 5% - 50% 10% - 33.3% Motor vehicles Aircraft 6.67% Golf course development expenditure 1% - 1.75% Plantation development expenditure 5% Recreational livestock and apparatus and others 10% - 25%

(12) Plantation Development Expenditure

New planting and replanting expenditure incurred respectively on land clearing and upkeep of trees to maturity and harvesting are capitalised as plantation development expenditure. Plantation development expenditure is amortised over twenty years upon maturity of the crop.

30 April 2006

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(13) Insurance Reserves

The unearned premium reserves ("UPR") represent the portion of the net premiums of insurance policies written that relate to the unexpired periods of the policies at the end of the financial year.

UPR at the balance sheet date is determined in accordance with the method that most accurately reflects the actual liability as follows:

- 25% method for marine cargo, aviation cargo and transit;
- 1/24th method for all other classes of business (except non-annual policies), reduced by the corresponding percentage of accounted gross direct business commissions and agency related expenses not exceeding the limits specified by Bank Negara Malaysia ("BNM") as follows:

Motor and annual bond policies 10% Fire, engineering and marine hull 15% Other classes 25%

- 1/8th method for overseas inward treaty business with a deduction of 20% for commission;
- Non-annual policies with duration of cover extending beyond one year is time apportioned over the period of the risk.

(14) Acquisition Costs for Insurance Policies

Acquisition costs, which are costs directly incurred in acquiring and renewing insurance policies, net of income derived from ceding reinsurance premiums is recognised as incurred and properly allocated to the periods in which it is probable they give rise to income.

(15) Provision for Claims

A liability for outstanding claims is recognised in respect of both direct insurance and inward reinsurance. The amount of outstanding claims is the best estimate of the expenditure required together with related expenses less recoveries to settle the present obligations at the balance sheet date.

Provision is also made for the cost of claims, together with related expenses incurred but not reported at balance sheet date, using a mathematical method of estimation based on the actual claims development pattern.

(16) Employee Benefits

(i) Short term benefits

Wages, salaries, bonuses and social security contributions are recognised as an expense in the year in which the associated services are rendered by employees of the Group. Short term accumulating compensated absences such as paid annual leave are recognised when services are rendered by employees that increase their entitlement to future compensated absences. Short term non-accumulating compensated absences such as sick leave are recognised when the absences occur.

(ii) Defined contribution plans

Contributions relating to defined contribution plans are charged to the income statement when incurred. As required by law, companies in Malaysia make contributions to the Employees Provident Fund. Retirement benefits for employees of foreign subsidiary companies are accrued for in accordance with the provisions of those foreign countries' retirement law and are charged to income statement in the period to which they relate.

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(16) Employee Benefits (cont'd)

(iii) Defined benefit plans (cont'd)

The Group's net obligations in respect of defined benefit plans for certain subsidiary companies are calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine the present value, and the fair value of any plan assets is deducted. The discount rate is the market yield at the balance sheet date on high quality corporate bonds or government bonds. The calculation is performed by an actuary using the projected unit credit method.

Past service cost is recognised in the income statement to the extent that the benefits are already vested. When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is recognised as an expense in the income statement on a straight-line basis over the average period until the benefits become vested.

In calculating the Group's obligation in respect of a plan, to the extent that any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the defined benefit obligation and the fair value of plan assets, that portion is recognised in the income statement over the expected average remaining working lives of the employees participating in the plan. Otherwise, the actuarial gain or loss is not recognised.

Where the calculation results in a benefit to the Group, the recognised asset is limited to the net total of any unrecognised actuarial losses and past service costs and the present value of any future refunds from the plan or reductions in future contributions to the plan.

(17) Intangible Assets

Goodwill on consolidation represents the excess of the purchase price over the fair value of the net assets of the investment in subsidiary and associated companies at the date of acquisition less proportionate amounts written off for subsequent disposals of these investments. Positive goodwill is retained in the consolidated balance sheet at cost less impairment losses. Negative goodwill is shown as a deduction from the positive goodwill on consolidation of the Group.

Goodwill arising on the acquisition of subsidiary companies is presented separately in the balance sheet while goodwill arising on the acquisition of associated companies is included within the carrying amount of investments in associated companies.

Goodwill or negative goodwill is not amortised. Goodwill is reviewed at each balance sheet date and will be written down for impairment when it is considered necessary.

Product development expenditure that is identifiable to specific products is stated at cost less accumulated amortisation and impairment losses. This expenditure is amortised over eight years on a straight line basis upon commencement of sales of the related products. The unamortised amount is written off immediately when it is no longer probable of being recovered from the expected future economic benefits. All other research and development expenditure is written off as incurred.

Trademarks are stated at cost less amortisation over a period of 20 years and impairment losses.

Other intangible assets include the cost incurred on the technology and transfer of technical know-how and are amortised over a period of eight years on a straight-line basis.

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(18) Income Tax

Tax on profit or loss for the year comprises current and deferred tax. Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of the previous year.

Deferred tax is provided, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is not recognised if the temporary difference arises from goodwill which are not deductible for tax purposes or from the initial recognition of assets or liabilities that at the time of transaction affects neither accounting nor taxable profit. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

Deferred tax is recognised in income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised directly in equity, or when it arises from a business combination that is an acquisition, in which case it is included in the resulting goodwill or negative goodwill.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised.

(19) Cash and Cash Equivalents

Cash comprises cash in hand, at bank and demand deposits.

Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts subject to insignificant risk of changes in value, against which the bank overdrafts, if any, are deducted.

The Group has excluded clients' monies and remisiers' deposits held in trust by the stockbroking subsidiary companies, deposits for golf club membership trust account and security retainer accumulation fund from its cash and cash equivalents.

(20) Provisions

Provisions for liabilities are recognised when the Group and the Company have a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

(21) Impairment of Assets

At each balance sheet date, the Group and the Company review the carrying amounts of their assets, other than inventories, receivables, other non-currrent investments and marketable securities, to determine whether there is any indication of impairment. If any such indication exists, impairment is measured by comparing the carrying values of the assets with their recoverable amounts. Recoverable amount is the higher of net selling price and value in use, which is measured by reference to discounted future cash flows.

An impairment loss is recognised as an expense in the income statement immediately. Reversal of impairment losses recognised in prior years is recorded when the impairment losses recognised for the asset have decreased or no longer exist.

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(22) Financial Instruments

Financial instruments are recognised in the balance sheet when the Group or the Company has become a party to the contractual provisions of the instrument.

(i) Investments

Non-current investments

Non-current investments comprise quoted and unquoted securities, Malaysian Government Securities ("MGS"), bonds and club memberships but exclude investments in subsidiary and associated companies.

MGS and other approved investments as specified by BNM are stated at cost adjusted for the amortisation of premiums or accretion of discounts calculated on an effective yield basis from the date of purchase to their maturity dates.

Government guarantee bonds and unquoted corporate bonds which are secured or which carry a minimum rating of "BBB" or "P3" are stated at cost adjusted for amortisation of premiums or accretion of discounts, where applicable, to their respective maturity dates. Any corporate bond with a lower rating is stated at the lower of cost and market value.

Other non-current investments are stated at cost less impairment loss. Investments in quoted securities of the general insurance subsidiary are stated at the lower of cost and market value determined on an aggregate portfolio basis by category of investments, except that if diminution in value of a particular investment is not regarded as temporary in accordance with the BNM Regulation 1996 ("BNM Regulation"), a write down is made against the value of the investment.

Current investments

Investments in quoted shares and marketable securities held by the insurance subsidiary company are stated at the lower of cost and market value on the aggregate portfolio basis by category of investments.

Other current investments are stated at the lower of cost and net realisable value.

Transfers between long term and short term investments, if any, are made at the lower of carrying amount and market value.

(ii) Receivables

Trade and other receivables are carried at anticipated realisable values. All known bad debts are written off while doubtful debts are provided for based on estimates of possible losses that may arise from non-collection.

Hire purchase and equal payment receivables are stated net of unearned carrying charges and allowance made for doubtful debts when collection of the full amount is no longer probable.

Specific allowances are made for any debts that are considered doubtful or have been classified as non-performing. Clients' accounts for the stockbroking subsidiary companies are classified as non-performing under the following circumstances in accordance with relevant regulatory guidelines:

| Type of accounts | <u>Criteria</u> |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------|
| - Contra losses | An account is classified as doubtful when the account remains outstanding for |
| | 16 to 30 calendar days from the date of contra transactions and bad when it is outstanding for more than 30 days. |
| - Overdue purchase contract | An account is classified as doubtful when the account remains outstanding from |
| | T+4 market days to 30 calendar days and bad when it is outstanding for more than |
| | 30 days. |
| - Margin accounts | When the value of the collateral has fallen below 130% of the outstanding |
| | balance. |
| - Premiums | When the account remains in arrears for more than six months from the date on |
| | which they become receivable. |

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(22) Financial Instruments (cont'd)

(iii) Payables

Trade and other payables are stated at cost which is the fair value of the consideration to be paid in the future for goods and services received.

(iv) Interest bearing borrowings

Interest bearing bank loans and overdrafts are recorded at the amount of proceeds received.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. The amount of borrowing costs eligible for capitalisation is determined by applying a capitalisation rate which is the weighted average of the borrowing costs applicable to the Group's borrowings that are outstanding during the year, other than borrowings made specifically for the purpose of obtaining another qualifying asset. For borrowings made specifically for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalisation is the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of that borrowing.

All other borrowing costs are recognised as an expense in the income statement in the period in which they are incurred.

(v) Convertible loan stocks

As permitted under the transitional provision of MASB24: Financial Instruments: Disclosure and Presentation, those convertible loan stocks, which were issued before the effective date of MASB24, are classified in accordance to the predominant nature of the convertible loan stocks of either equity or liability.

BCorp ICULS were issued pursuant to the SOA, repayment of bank borrowings, rights issue and settlement of inter-company balances. As part of the terms of the repayment of bank borrowings, BCorp and one of its subsidiary companies entered into a put and call option arrangement for part of the BCorp ICULS with the lenders. BCorp ICULS, with its irredeemable feature and 0% coupon rate, are classified as equity. However, for those BCorp ICULS that are under the put option, these are classified as liability.

(vi) Equity instruments

Ordinary shares are classified as equity. Dividends on ordinary shares are recognised in equity in the period in which they are approved for payment.

The transaction costs of an equity transaction are accounted for as a deduction from equity. Equity transaction costs comprise only those incremental external costs directly attributable to the equity transaction which would otherwise have been avoided.

(23) Segmental Information

The Group adopts business segment analysis as its primary reporting format and geographical segment analysis as its secondary reporting format.

Segment revenues and expenses are those directly attributable to the segments and include any joint revenue and expenses where a reasonable basis of allocation exists. Revenue and expenses do not include items arising on investing or financing activities. Revenue is attributed to geographical segments based on location of customers where the sales are transacted.

Segment assets include all operating assets used by a segment and do not include items arising on investing or financing activities. Assets are allocated to a segment based on location of assets. Segment liabilities comprise operating liabilities and do not include liabilities arising on investing or financing activities such as bank borrowings.

(a) Retirement benefits

The Group's obligations under the respective plans are determined based on periodic actuarial valuation where the amount of benefits that employees have earned in return for their service in the current and prior years is estimated. The amount recognised in the balance sheet represents the present value of the defined benefit obligations adjusted for any unrecognised actuarial gains and losses, and reduced by the fair value of plan assets, where applicable.

Certain subsidiary companies of the Group operate a defined benefits plan for their employees. Under the scheme, eligible employees are entitled to retirement benefits at 1.5% and 1.67% of the monthly pensionable salary for every year of service on attainment of the retirement age of 65.

A subsidiary company operates funded, defined retirement benefit scheme ("the Scheme") for its eligible employees. Contributions to the Scheme are made to a separately administered fund. Under the Scheme, eligible employees are entitled to the retirement benefits on attainment of the retirement age of 55, on medical incapacity, on death or on resignation after five years of service.

Certain other subsidiary companies operate an unfunded, defined retirement benefit scheme and provision is made at contracted rates for benefits that would become payable on retirement of eligible employees. Under the scheme, eligible employees are entitled to retirement benefits varying between 18 days and 52 days per year of final salary on attainment of the retirement age of 55. The amounts recognised in the balance sheet are determined based on the present value of unfunded defined benefit obligations.

Details of significant commitments are as follows:

- (a) In 1999, BLand shares were issued pursuant to a debt conversion exercise undertaken by the subsidiary company, BLand, with its lenders. BGroup had granted a put option to the lenders to sell their BLand shares to BGroup. The put option expired on 30 December 2004. However, the put option has been extended for a period not exceeding five years from the previous expiry date. The Group's commitment with regard to the put option is approximately RM62,515,000 as at 30 April 2006. The extended put option is secured, inter alia, by shares and properties pledged to the lenders.
- (b) As part of the terms for the disposal of Convenience Shopping Sdn Bhd ("CSSB") by Global Empires Sdn Bhd ("GESB"), a wholly owned subsidiary company of BGroup which in turn is wholly owned by the Company, to Premier Merchandise Sdn Bhd ("PMSB") (The Group's interest in PMSB was diluted to 0.002% in the financial year ended 30 April 2005.), BGroup undertook a profit guarantee whereby if the aggregate profit after tax ("APAT") of CSSB for three financial years from 30 April 2005 to 30 April 2007 is below the guaranteed amount, BGroup is liable to pay to PMSB the shortfall amount. In addition to the profit guarantee, a put option is granted to PMSB by BGroup whereby if the APAT is less than RM25.4 million, PMSB has the option to put to BGroup the CSSB shares at RM90.0 million plus a holding cost of 7% per annum compounded. Also, a call option is granted by PMSB to BGroup whereby if the APAT is less than RM20.9 million and PMSB intends to claim the shortfall in excess of a fixed amount, BGroup has the option to acquire the CSSB shares at RM90.0 million plus a holding cost of 7% per annum compounded. Currently, PMSB is a wholly owned subsidiary company of Intan Utilities Berhad ("Intan"), a company listed on the Bursa Malaysia and deemed to be a related party by virtue of the interest of Tan Sri Vincent Tan in Intan. CSSB is Intan's principal subsidiary company operating its core business. The directors are of the opinion that even if CSSB's APAT is less than RM25.4 million, Intan is unlikely to exercise its put option and lose its core business.
- (c) Significant commitments for acquisition of properties and investments are included in Notes 39(B), 40(A) and 40(B).

38. FINANCIAL INSTRUMENTS (CONT'D)

(3) Interest Rate Risk

The Group's primary interest rate risk relates to interest bearing assets and interest bearing borrowings.

The interest bearing assets are made up of deposits with licensed financial institutions, staff loans and interest bearing receivables.

The Group manages the interest rate risk of its deposits with licensed financial institutions by placing them at the most competitive interest rates obtainable, which yield better returns than cash at bank and by maintaining a prudent mix of short and long term deposits and actively reviewing its portfolio of deposits. The Group also ensures that the rates contracted for its interest bearing receivables are reflective of the prevailing market rates.

The Group manages its interest rate risk exposure from interest bearing borrowings by maintaining a mix of fixed and floating rate borrowings. The Group actively reviews its debt portfolio, taking into account the investment holding period and nature of its assets. This strategy allows it to capitalise on cheaper funding in a low interest rate environment and achieve a certain level of protection against rate hikes.

(4) Market Risk

The Group's principal exposure to market risk arises mainly from the changes in the price of investments quoted on Bursa Malaysia.

The risk of loss in value of the Group's quoted investments is minimised via proper assessment before making investments and continuous monitoring of the performance of the investments. Trading account securities are classified as current assets and are available for sale and the Group manages its disposal to optimise returns on realisation.

Changes in prices of these shares may also affect the value of equity collateral held for certain trade receivables. The Group minimises such risks by enforcing effective credit risk policies stated in Note 38(5) below.

(5) Credit Risk

Credit risk, or the risk of counterparties defaulting, is controlled by the application of credit approval limits, monitoring procedures and assessment of collateral values. A credit approval authority limit structure is in place for all lending activities of the Group. Receivables are monitored on an ongoing basis via management reporting procedures.

(6) Liquidity Risk

The Group actively manages its operating cash flows and the availability of fund so as to ensure that all funding needs are met. As part of its overall prudent liquidity management, the Group maintains sufficient levels of cash or cash convertible investments to meet its working capital requirements. In addition, the Group strives to maintain available banking facilities of a reasonable level to its overall debt position. As far as possible, the Group raises committed funding from both capital markets and financial institutions and prudently balances its portfolio with some short term funding so as to achieve overall cost effectiveness.

It is not practical to estimate the fair values of the Group's investment in unquoted shares because of the non-availability of a market price and the inability to estimate fair value without incurring excessive costs.

38. FINANCIAL INSTRUMENTS (CONT'D)

(7) Fair Values (cont'd)

The nominal/notional amounts and net fair value of financial instruments recognised in the balance sheets of the Group and the Company as at the end of the financial year are:

| | | Gro | oup | Company | |
|--------------------------------------------|------|------------------------------|-----------------------------|------------------------------|-----------------------------|
| | Note | Notional Amount RM'000 | Net Fair Value RM'000 | Notional Amount RM'000 | Net Fair Value RM'000 |
| At 30 April 2006 Contingent liabilities | 37 | 2,204 | ٨ | 69,196 | ٨ |
| At 30 April 2005 Contingent liabilities | 37 | 2,145 | ٨ | _ | - |

^ It is not practical to estimate the fair value of contingent liabilities and assets reliably due to the uncertainties of timing, costs and eventual outcome.

The following methods and assumptions are used to estimate the fair values of the following classes of financial instruments:

i) Cash and bank balances, trade receivables, other receivables and other payables (other than those mentioned below), trade payables and short term borrowings.

The carrying amounts approximate fair values due to the relatively short term maturity of the financial instruments.

It is also not practical to estimate the fair values of amount due from related companies (in Note 12) and amount due to related companies (in Note 16) principally due to lack of fixed repayment terms entered into by the parties involved and without incurring excessive costs. However, the Group does not anticipate the carrying amounts recorded at the balance sheet date to be significantly different from the values that would eventually be received or settled. The fixed interest bearing borrowing of the Group provides an insulation against upward change in interest rates, however, the Group will not be able to benefit if interest rates fall.

ii) Non-Current Quoted Investments

The fair values of non-current quoted investments as disclosed in Note 4 is determined by reference to stock exchange quoted market bid prices at the close of the business on the balance sheet date.

The fair value of unquoted corporate bonds are indicative values obtained from the secondary market.

iii) Hire Purchase, Lease and Equal Payment Receivables

The fair values of hire purchase, lease and equal payment receivables are estimated by discounting the expected future cash flows using the current average yield from lending activities with similar profiles.

iv) Block Discounting, Hire Purchase and Lease Payables

The fair values of block discounting, hire purchase and lease payables are estimated by discounting the expected future cash flows using the current interest rates for liabilities with similar risk profiles.

38. FINANCIAL INSTRUMENTS (CONT'D)

(7) Fair Values (cont'd)

v) Borrowings

The carrying values of long term borrowings which bear floating interest rates are expected to approximate fair values and would not be significantly different from the values that would eventually be settled.

vi) BLB ICULS

The fair value of the portion of quoted BLB ICULS under put option granted to certain financial institutions is determined by the present value of the estimated future cash outflow at the end of the put option period. The fair value of the rest of the quoted BLB ICULS is as determined by reference to stock exchange market bid prices at the close of the business on the balance sheet date.

vii) BCorp ICULS

The fair value of the portion of quoted BCorp ICULS under put option granted to certain financial institutions is determined by the present value of the estimated future cash outflow at the end of the put option period.
